

GP PowerBank (16914)

Charger incl. 4 pcs of GP 1300mAh AA NiMH batteries
Charges 4pcs of AA/4 pcs of AAA NiMH

- 2-channel charging
- Aprx. 16 hours charging time to fully charge empty batteries
- Green diode when charging
- Trickle charging
- The batteries can always remain in the charger (can not overload)

GP PowerBank 3 (202013)

Charger incl. 4 pcs of GP 1800mAh AA NiMH batteries
Charges 4 pcs of AA/ 2 pcs of AAA NiMH

- Aprx. 18 hours charging time to fully charge empty batteries
- Passes to trickle charging
- Automatic timer indicates when the batteries are fully charged, the diode will switch from red to green after 18 hours
- The batteries can always remain in the charger (can not overload)
- 2-channels charging – the batteries are being charged in pairs

GP PowerBank Rapid 2 (202035)

Fast charger (2-5 h) incl. 4 pcs of GP 2100mAh AA NiMH batteries
Charges 4 pcs of AA/2 pcs of AAA NiMH

- Aprx. 2-5 h charging time regarding the amount of batteries being charged at the same time
- The diode is red while charging is in progress and switches to green when fully charged
- $-\Delta V$ and temperature sensor indicating fully charged batteries
- Equipped with extra security timer
- Security detection against incorrect batteries, in this case the diode will flash and charging will not begin

GP PowerBank Quick 2 (202046)

Charger incl. 4 pcs of GP 2300mAh AA NiMH batteries
Charges 4 pcs of AA/2 pcs of AAA NiMH

- 2-channel charging
- Aprx. 6 hours charging time to fully charge empty batteries
- 2-colored LED-indicator
- Equipped with extra security timer
- The batteries can always remain in the charger (can not overload)

GP PowerBank Travel (202053)

Fast charger (2-5 h) incl. 4 pcs of GP 2500mAh AA NiMH batteries and charging cord for cars
Charges 4 pcs of AA/2 pcs of AAA NiMH

- 4 separate charging channels – each battery charges separately, independant of each ther
- Aprx. 2-5 hours charging time regarding the amount of batteries beeing charged at the same time
- The diode is red while charging is in progress and swithces to green when fully charged
- -deltaV and temperature sensor indicating fully charged batteries
- Security detection against incorrect batteries, in this case the diode will flash and charging will not begin
- Charging cord for cars included (12V).

GP PowerBank U-Smart (202050)

Ultrafast charger (30 mins) incl. 4 pcs of GP 2500mAh AA NiMH batteries
Charges 4 pcs of AA/4 pcs of AAA NiMH

- 4 separate charging channels – each battery charges separately, independant of each other
- Aprx. 30 minutes charging time regardless of the amount of batteries beeing charged
- The diode is red while charging is in progress and swithces to green when fully charged
- -deltaV and temperature sensor indicating fully charged batteries
- Built-in fan for extra protection against overheating
- Security detection against incorrect batteries, in this case the diode will flash and charging will not begin
- Also available; Charging cord for cars (12V).
Item no: 202017
