

# Nippo 1.8 headlamp with ADS/ Advanced Dimming System and red/ white diodes

Product code: AHL0012

## Specification:

Batteries included:	✓
Safety lock:	✓
Operation time:	Cree: 100% 3h, 10% 43h; 2xNichia: 100% 20h, 10% 70h
Operation time RED LED:	30h
Color of emitted light:	Cree cold white, Nichia warm white
Material:	tworzywo sztuczne
Light output:	Cree 180 lm, 1 500 cd; 2 x Nichia 30 lm
Headlamp strap:	✓
Series:	Adventure Line
Operation modes:	ADS Tech. 100-10%
Weight:	76g
Waterproof:	IPX4
Shockproof:	1m
Dimensions:	59 × 46 × 34 mm
Light Distance:	78 m
Power supply:	3 x AAA
Light source:	Cree® XP-G2 + 2 × 5mm Nichia® LED + 2 × 5mm Nichia® Red LED
:	76

## Product description

With its 3 light sources, the Nippo 1.8 gives you the right light, all night, until sunrise. A Cree 180 lm LED provides a powerful spot beam for up to 78 meters. Switch on the 2 Nichia warm light LEDs to avoid reflection on close jobs or to softly illuminate your tent. 2 red LEDs prevent losing your night vision when out in the field, perfect for consulting a map. Powered by 3 AAA batteries (included), the Nippo 1.8 provides light for nearly 3 days.

Rather than preselected power modes with large jumps, Nippo 1.8 possess Macronic's propriety "Advanced Dimming System" (ADS) for

smooth brightness control. ADS gives an infinite adjustment to power the lamp on your head exactly for each task at hand.

An intelligent memory function remembers the last output used, resuming the last ADS setting employed. Handy when hiking or hunting to prevent temporary blindness due to a bright beam or scaring off game.

The switch lock prevents accidental battery drain during storage and transport, making sure the Nippo 1.8 won't let you down when you need to set up camp or navigate a tricky trail.

A 90° adjustable head puts the light right where you need it regardless of your position.

With a waterproof rating of IPX4 and shock resistance of a meter, the Nippo 1.8 is Sumo tough as it is stylish.
