Series:	Adventure Line
Rear warning light:	RGB
Battery control system :	✓
Weight:	255 g
Waterproof:	IPX4
Shockproof:	1m
Dimensions:	head: 86 × 39 × 47; battery case: 80 × 56 × 42
Light Distance:	191 m
Power supply:	4 x AA
Light source:	2 x Cree® XP-G2 + 4 x 5mm Nichia® LED
:	255

Product description

With three dedicated light sources, a vast combination of operation modes and output, the powerful 500 lm Phantom puts performance in your pack. 2 separate lenses deliver spot or flood light and work independently, or together, empowering you to customize the output.

Along with the dual Cree LEDs, we've outfitted the Phantom with four Nichia diodes for an antireflective, warm glow light that is perfect for reading in your tent or conversing around the fire without blinding your fellow campers. Our propriety "Advanced Dimming System" (ADS) for smooth brightness control, gives an infinite adjustment of the light to meet every individual lighting requirement.
