

Tail bicycle lamp Mickey, 2 x 0,5W LED

Product code: BPM-9SL

Specification:

Operation time low brightness:	7h
Operation time flashing mode:	8h
Operation time medium brightness:	3,5h
Light output:	28 lm
Operation modes:	50%, 75%, 100%, flashing
Dimensions:	62 x 33 x 45 mm
Power supply:	USB
:	40

Product description

In this small and compact housing Mickey hides two half Watts LEDs that give a strong light of 28 lm output. This way you will always be visible, even riding on lightless roads at night. Extremely easy to use silicone clasp fits most seat post and additionally ensures ease of assembly and disassembly. Rechargeable via USB, it is ready to operate as early as in 3h, giving light even through 8h.
