

M-FIRE AG Right angle battery flashlight with Ex-ATEX Certificate

Product code: PHH0021

Specification:

Batteries included:	✓
Operation time:	100% - 6h; 50% - 10h 30min
Clip:	✓
Light output:	200 lm
ATEX NO.:	I M1 Ex ia I Ma / II 1G Ex ia IIC T4 Ga Sira 15ATEX 2166X
Operation modes:	100%; 50%
Weight:	250g
Waterproof:	IPX4
Dimensions:	183 × 69 × 63 mm
Light Distance:	240m
Power supply:	4 x AA
Light source:	Cree® XP-G LED
UP Light output:	200 lm
UP Light source:	Cree® XP-G LED
UP Power supply:	4 x AA
UP Operation time:	6h
:	250

Product description

The right-angled M-Fire AG easily clips to firefighters', EMS personnel's' and first responders' uniforms or belts, providing critical illumination while freeing their hands to tackle the emergency at hand. The flashlight's slim profile securely hugs the body, preventing dangerous entanglements or being knocked off in close quarters. The Cree LED 200 lms pierce smoke and dust for up to 240 m, with 4 AA batteries powering the M-Fire AG for 10 hours 30 min. Ex-ATEX intrinsically safe certification and an IPX4 waterproof rating make the M-Fire AG the best light to take to the worse environments.
